VISVESVARAYA TECHNOLOGICAL UNIVERSITY

Jnana Sangama, Belagavi – 590018, Karnataka, India

A PROJECT PHASE – 1

REPORT ON

"Agri guide: integrated web application for farmers support and marketing place"

A dissertation submitted in partial fulfillment of the requirement for the degree of

BACHELOR OF ENGINEERING

IN

COMPUTER SCIENCE AND ENGINEERING

Submitted by

BHUVAN GOWDA R (1RG24CS400)

ESHA BHARADWAJ (1RG24CS404)

PRAVEEN (1RG24CS414)

SATISH (1RG24CS416)

Under the guidance of

Mr. NANDAKUMAR

Assistant Professor

Department of Computer Science and Engineering

RGIT, Bengaluru – 32

Department of Computer Science and Engineering

RAJIV GANDHI INSTITUTE OF TECHNOLOGY

Cholanagar, R.T Nagar Post, Bengaluru – 32

2025 - 2026

RAJIV GANDHI INSTITUTE OF TECHNOLOGY

(Affiliated to Visvesvaraya Technological University)

Cholanagar, R.T Nagar Post, Bengaluru – 560032

Department of Computer Science and Engineering

CERTIFICATE

This is to certify that the Mini Project Report titled **" Agri guide: integrated web application for farmers support and marketing place "** is a Bonafide work carried out by **TEAM NO-21**, students at **RAJIV GANDHI INSTITUTE OF TECHNOLOGY** in partial fulfilment for the award of **Bachelor of Engineering in Computer Science and Engineering** under **Visvesvaraya Technological University, Belagavi,** during the year **2025 - 2026.** It is certified that all corrections/suggestions given for Internal Assessment have been incorporated in the report. This Project report has been approved as it satisfies the academic requirements in respect of the Project work prescribed for the said degree.

Signature of Guide	**Signature of HOD**	**Signature of Principal**
Mr. Nandakumar	**Dr. Arudra A**	**Dr. D G Anand**
Assistant Professor	Assoc. Professor & HOD	Principal

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

DECLARATION

We hereby declare that the Project report titled **"Agri guide: integrated web application for farmers support and marketing place"** submitted to the **Visvesvaraya Technological University, Belagavi** during the academic year **2025-2026**, is record of an original work done by us under the guidance of **Prof. Nandakumar,** Assistant Professor, Department of Computer Science and Engineering, Rajiv Gandhi Institute of Technology, Bengaluru and this project phase 1 report is submitted in the partial fulfilment of requirements for the award of the degree of **Bachelor of Engineering in Computer Science & Engineering.** The results embodied in this report have not been submitted to any other University or Institute for award of any degree or diploma.

BHUVAN GOWDA R (1RG24CS400)
ESHA BHARADWAJ (1RG24CS404)
PRAVEEN (1RG24CS414)
SATISH (1RG24CS416)

ACKNOWLEDGEMENT

We take this opportunity to express our sincere gratitude and respect to the **Rajiv Gandhi Institute of Technology, Bengaluru** for providing us an opportunity to carry out our project work.

We express our gratitude to **Dr. D G Anand,** Principal, RGIT, Bengaluru for providing the resources and support without which the completion of the Phase 1 of this Project activity would have been a difficult task.

We extend our thanks to **Dr. Arudra A**, Associate Professor and Head of Department of Computer Science & Engineering, RGIT, Bengaluru, for being a pillar of support and encouraging me in the phase of all adversities.

With profound sense of gratitude, We acknowledge the guidance and support extended towards us by **Prof. Nandakumar**, Assistant Professor, Dept of CSE, RGIT, Bengaluru. His incessant encouragement and valuable technical support have been of immense help in realizing this activity. His guidance gave us the environment to enhance our knowledge, skills and to reach the pinnacle with sheer determination, dedication and hard work.

We also want to extend our thanks to the entire faculty and support staff of the Department of Computer Science and Engineering, RGIT, Bengaluru, who have encouraged us throughout the course of Bachelor's Degree.

We want to thank our family for always being there with full support and for providing us with a safe haven to conduct and complete our project. We are ever grateful to them for helping us in these stressful times. Lastly, we want to acknowledge all the helpful insights given to us by all our friends during this project work.

SATISH (1RG24CS416)

ABSTRACT

Agriculture remains the backbone of many economies, especially in developing countries, where a majority of the population depends on farming for livelihood. However, farmers often face numerous challenges such as lack of access to timely information, market price fluctuations, limited direct access to buyers, inadequate knowledge of modern farming techniques, and dependence on intermediaries. To address these issues, the proposed system, Agri Guide: An Integrated Web Application for Farmers Support and Marketing Place, is designed as a comprehensive digital platform that empowers farmers through technology. The Agri Guide web application aims to provide a unified solution by integrating multiple services into a single platform. It offers real-time information on weather forecasts, crop selection guidance, pest control methods, and modern agricultural practices to enhance productivity and sustainability. Additionally, the platform includes a digital marketplace where farmers can directly connect with consumers, retailers, and wholesalers, thereby eliminating middlemen and ensuring fair pricing for their produce system supports user-friendly features such as farmer and consumer registration, secure login, product listing, order management, and communication tools. It also provides educational resources and expert advice to help farmers make informed decisions. By leveraging web technologies, the application ensures accessibility across devices, making it convenient for users even in rural areas. Overall, the Agri Guide platform seeks to improve farmers' income, reduce exploitation, and promote transparent and efficient agricultural trade. It contributes to rural development by bridging the gap between farmers and markets while enhancing knowledge dissemination. This project demonstrates how digital innovation can transform traditional agriculture into a more profitable, sustainable, and technologically advanced sector
